

## Wednesday Challenge Form

**Group Members:** Hunter, Alex, two other people, and me

**Problem Statement:** We had to cut a block to To exactly 2 inches long. The group whose Block measure 2 inches closer that the other Groups wins the challenge.

**Approach:** Our group was the group that got The exact measure of 2.000” on one corner. The way we did it was we put a guide above The block we were cutting at the time. This Method served us well in the end.

**Solution:** My group did not win the challenge But we did measure exactly 2”.

**Lessons Learned:** Consistency is key for this Challenge.
