## Wednesday Challenge Form

Group Members: Just me-David Lewis

Problem Statement: Create a 90 degree with a Straw. The winner is the one with the angle To 90 degrees.

Approach: My strategy was to do it as fast as Possible so I can create multiple triangle. I was also thinking of the angle of the other Angles of the triangle. This way I could tell If the triangle was right or not a right Triangle.

Solution: Unfortunaly, I came I last.

Lessons Learned: My strategy was rushed and My thinking wasn't on the task at hard.
